

Allotz Cloud Property Management Software

PROPERTY MANAGEMENT SYSTEMS ARE NOT ALL CREATED EQUAL!

Our software has modular capabilities allowing us to cater to all hotels from apartments, independent hotels, motels, bed & breakfasts, all the way up to “big box hotels” and groups of properties. It’s modern, easy to use and works on any size screen.

It is cloud based, so it’s accessible from anywhere, automatically backed up and always up to date with the latest version.

Accommodation Management Software

Intuitive screens means that it's easy to use and very importantly - easy for new staff members to learn.

Print beautiful and clear invoices for your customers.

Booking Manager

All your reservations in one place with a modern and easy to use calendar.

Dashboard

Understand your property's performance at a glance.

Intelligent PMS dashboard

AUTOMATION

Save hours of time by automating emails and payments such as: booking confirmations, taking payment on new bookings, sending email on invalid cards. We can automate any task.

SAVE HOURS!

Modern Booking Manager

Guest Profile

Know who your guests are. We build a database of all your guests and you have access to their information to see your best repeat guests. Create new bookings easily and use your stored information.

Channel Manager

Fully integrated with Allotz AutoPilot to automatically update your inventory and rates to all your online sales channels.

Mobile Compatible

Manage your property on the go with our app in your pocket; create new bookings, change prices, check-in and out and much more.

Point of Sale Systems

Integrations with Lightspeed and other POS systems. Check with us to see if your POS system is supported.

Rate Manager

Define your rates and rate plans, then easily update them all by just changing the master rate. Use seasons to automatically manage your high and low seasons, special events etc.

Easily view seasons and events with the rate manager.
